URGENT: DRUG RECALL

Digitek (digoxin tablets, USP)

April 28, 2008

Dear Valued Customer:

This is to inform you of a product recall involving:

Digitek® (digoxin tablets, USP)
NDC # 62794-145-01; 62794-145-10; 62794-145-56;
62794-146-01; 62794-146-10; 62794-146-56

See enclosed product labels (See Attachment 1).

This recall has been initiated due to overweight tablets. Potential risks to the patient depend upon the constituency of the tablets. Depending on the constituency of the tablets, double the dose is taken, it can be expected that digitalis toxicity can occur in individuals taking daily doses or in patients with renal insufficiency. Toxicity can cause nausea, vomiting, dizziness, low blood pressure, cardiac instability and bradycardia. Death can result from excessive digitalis intake. If the increased thickness is due to clinically inert substances, then a decreased amount of digitalis may be absorbed, leading to exacerbation of the underlying cardiac disease (congestive heart failure and arrhythmia) due to lack of therapeutic efficacy.

ACTAVIS has distributed the subject lots from 03/01/06 through 04/24/08. This recall should be carried out to the consumer level.

Upon receipt of this letter, please take the following action:

1. Immediately examine your inventory and quarantine and discontinue distribution of the affected lots.
2. In addition, if you may have further distributed the recalled product, please identify your retail-level customers and notify them at once of this product recall.
3. Additionally, if the retail-level customers have further distributed the recalled product, please identify the consumer and notify them immediately of this product recall.
4. Complete the enclosed form and mail it in the self-addressed, stamped envelope enclosed. To assure accountability, it is imperative that this form be returned even if you do not have product in stock or you have already returned the product.
